DoD JOINT IMAGERY
INTERPRETATION KEYS COMMITTEE

Minutes of Meeting Held in Room 1007

Thursday 15 January 1970

Presiding

Chairman

Members Present

1. (U) Security Level of Meeting

Discussion was limited to TOP SECRET and below.

2. (U) Approval of Minutes

The minutes of the previous meeting, 4 December 1969, were approved as written.

3. (U) Announcements

The next meeting is scheduled for Wednesday, 18 February 1970 at 0930 hours. The meeting will be held at the NRTSC in Suitland, Md.

4. (C) Old Business

a. Five Year Production Program

Review and validation of the FY 1970-1975 Production Program continued. The yearly production schedules of each Military Department and DIA were reviewed. Certain elements of information which require further clarification will be submitted prior to the next meeting. It is expected that a complete five-year program will be available at the next meeting.

b. NPIC/CIA Key Production

The requirements for key production identified by the Departments and Commands for NPIC and CIA had been collated and distributed prior to the meeting. [redacted] discussed the CIA/IAS key production on 20 Jan 70 and their position will be reviewed at the next meeting. Also, the NPIC position will be presented at this time.

c. Production Status

layout December 1969.

KDA-07/0002-70 North Korea Ground Forces
Installations - compilation 50% complete.

5. (C) New Business

a. Color Chapter to PI Handbook - The Navy representative requested contributions for the Color Chapter to be made available at the next meeting.

b. R&D Developments affecting Key Formats - Members unanimously recommended that the chairman request from the Departments information on research and development underway on new exploitation equipment. This subject was tabled by the Army representative at the meeting of 20 Feb 1969. At that time it was recommended that the members themselves could serve to update the committee in these matters. However, it is felt that since there are several units/labs addressing the PI equipment problem in each service, Keyscom could act as a focal point for gathering this information. This would serve to assure the effective integration of keys/chips into the future operating environments of TIPI, TIIF, and 101C systems.

c. Access to Giant Scale Imagery - The Army representative requested assistance in obtaining access to GS imagery obtained over certain sensitive areas. The chairman in coordination with XX and AP-10 resolved the problem to the satisfaction of all concerned.
